PERSONAL DETAIL

Hardworking student with the passion for any kind of science, and ready to utilize my skills and passion to further the mission of the project. In my life, I've experienced both theoretical and practical approach to scientific topic. In my High school diploma, I develop my practical skills with mechanical and design problem. During my BSc studies I studied not only the experimental aspect of physics, but the theoretical one too, in particular in my thesis project I studied Dark Matter particle involved in scattering process. At the end of my BSc I plan to attend an MSc in theoretical physics to expand my knowledge of the subject.
